

MAINTENANCE

oceancare PRODUCTS

Oceanside Glasstile is proud to introduce, Oceancare, an innovative line of sealing and maintenance products for tile and natural stone. Developed by Oceanside Glasstile using cutting-edge chemical technology, Oceancare products are highly effective, easy to use and environmentally friendly.

Oceancare products address the most common concerns associated with tile and natural stone maintenance and, when used in conjunction with one another, provide a complete maintenance solution without the damaging effects of bleach, acid, ammonia or abrasive cleaners. While Oceancare is specifically designed to work with Oceanside Glasstile and other glass tile products it is also an excellent choice for most tile types, including porcelain, ceramic and natural stone.

For product availability and pricing please contact an Oceancare dealer or visit our website www.oceancareproducts.com.

SEALING

Oceancare High Performance Penetrating Sealer – Hybrid Carrier Technology™

Traditionally, penetrating sealers have been available in either a water or solvent-based formula. Each had its benefits, but the consumer was forced to choose... until now. Through the discovery of a revolutionary water/solvent blending process, High Performance Penetrating Sealer offers the convenience and safety of a water-based formula combined with the ease of use and performance of a solvent-based formula. Superior stain protection*, low residue, low odor, low VOC's and the ability to seal damp or uncured grout; *Hybrid Carrier Technology™* is an evolutionary leap in sealer development and brings you the best of both worlds.

Oceancare High Performance Penetrating Sealer Penetrates and protects grout, natural stone and other porous masonry materials. Forms an invisible, no-sheen barrier that is resistant to water and oil and provides superior stain protection. Low residue formula is specially designed to be easier and faster to apply than traditional penetrating sealers. Will not alter the natural look of tile or grout and may be applied to dry, damp, cured or uncured grout or natural stone (seriously... immediately after grouting!).

* Based on CTI-T72 stain testing.

GENERAL CLEANING

The key to successfully maintaining any tile installation is regular, proper maintenance. Food or other spills (i.e. coffee, wine, citrus) should be wiped up immediately. For regular cleaning use a nylon scrub-brush or 3M white nylon scrub pad and the appropriate cleaner listed below.

Oceancare pH Neutral Tile and Stone Cleaner

A non-toxic, biodegradable, all-purpose cleaner, designed for daily use on almost any hard surface. Cleans glass tile, grout, granite countertops, porcelain, ceramic and natural stone.

Oceancare All Natural Degreaser

A 100% natural, plant derived, citrus-based degreaser that quickly cuts through grease and oil. Cleans glass tile, cooktops, appliances, grout, granite countertops, porcelain, ceramic and natural stone.

Oceancare Glass Tile Shower Cleaner

A CFC free aerosol cleaner, ideal for cleaning glass tile tub-surrounds and showers. Ammonia free formula will not damage natural stone or existing sealers. The aerosol foam clings to vertical surfaces and cuts through soap scum and body oil. Designed for regular use on glass tile, grout, metal fixtures, porcelain, ceramic and natural stone.

CEMENT-BASED GROUT HAZE

Sulfamic Acid Cleaner - Cure the installation a minimum of 10 days after grouting. Following the Sulfamic Acid manufacturer's instructions, remove haze with a nylon scrub brush or nylon scrub pad (3M white). Thoroughly rinse with clean water and towel dry.

POOL MAINTENANCE

Maintaining proper water balance and chemistry is critical for the prevention of mineral scale build-up in pools and water features. Detailed information regarding water balance chemistry and pool tile maintenance is available in the Installation section of our website www.glasstile.com.

Oceancare All Natural Degreaser

A 100% natural, non-toxic, citrus-based formula that effectively cuts through body oil, sunscreen and makeup, which accumulate on pool waterlines. Designed for use with most pool tile and vinyl pool liners.

Oceancare Calcium Releaser

A non-toxic, acid-free cleaner that effectively removes calcium deposits and efflorescence from pool tile. Calcium deposits are removed in layers through the use of advanced acid-mimic technology, which specifically targets mineral build-up without damage to the tile surface or metal finishes. When applied prior to media-blasting, Calcium Releaser softens and loosens deposits, which allows for the use of less aggressive media, reduced blasting time and reduced media consumption. Designed for use with most pool tile types, including glass tile, porcelain and ceramic.

WARNING

Certain acids will damage the iridized surface of Oceanside Glasstile. Do not allow products that contain hydrofluoric, hydrochloric, muriatic or phosphoric acid to come in direct contact with the tile. In the case of accidental contact, neutralize immediately with baking soda and water. Care should be taken to protect the surface of the tile when using acids in the pool finishing process or when adding acid to the pool water.
